optakt

MONTHLY REPORT · 1–30 SEPTEMBER 2026

What the agent took care of.

September 2026: one month of an Optakt agent working for one founder, fifteen roles, the results in each, and the work behind them.

September 2026.

This edition covers 1–30 September 2026: one month of an Optakt One agent working for Max Wolter, founder of Optakt. The agent was not yet called Zero. It ran as four agents, Maximus, One, Lux and Boltagon, each on its own deployment with its own conversations. On 19 September the founder and the agents agreed to merge them into one agent named Zero, and the merge was carried out on 1 October. Everything in this edition is the work of those four agents.

Most of the month went into the product. Optakt One moved from release candidate 8 to release candidate 14. By the end it served several users and several agents from one deployment, installed and upgraded with one command on Linux and macOS, received and sent files and voice notes, and had each release judged by an unattended acceptance battery on bare machines.

The founder's operations ran alongside the product work. Legal files were prepared for counsel. Bank feeds were connected and the accountant's open bookkeeping questions were answered. The document vault and the Summit archive were rebuilt, mailboxes were connected and triaged, and planning for the 2027 Summit began.

Roles are listed as a client would buy them, heaviest first. Figures are outcomes taken from the month's records, not counts of effort. Legal, financial and health matters are described only in general terms, and people other than the founder appear by role.

The month at a glance.

Optakt One

RC8 → RC14
release candidates in one month

25/25
acceptance cases passed on a bare machine

2
platforms installed and upgraded: Linux and macOS

Operations

26
matter files in a register for counsel

11
bank accounts linked across entities

4,497
vault files indexed and named

Founder

124
open tasks in one prioritised list

4
mailboxes connected and triaged

2
X accounts with separate content lines

Conscious Health Summit

1,816
contacts ranked for 2027 outreach

5,916
Drive items consolidated into one archive

5,434
archive records rebuilt, 0 missing

Optakt Labs

37
accounting documents recovered for the accountant

64.8%
model-identification accuracy against 12.5% chance

48.9% → 62.0%
test coverage of a research codebase

15	5	30	1
ROLES	AREAS	DAYS	AGENT

01 OPTAKT ONE

Software engineering team

Builds the product: an agent that remembers, runs on the customer's machine, works with any model and lives in the team's chat.

7	2	~17
release candidates shipped, rc.8 to rc.14	platforms with one-command install and upgrade: Linux and macOS	file formats the agent reads, verified live

WHAT IT TOOK CARE OF

01	Multi-user and multi-agent: agent scopes and conversation spaces, owners, admins and members, a vault per scope, providers and model choice per scope and space
02	A new terminal client as the main interface, and a one-command installer with seven gates and an agent that repairs failures
03	Upgrades from RC8 run as journaled steps with rollback, covering earlier Linux and Mac layouts and an existing PostgreSQL server
04	Telegram replies, edits and reactions now reach the agent; private-chat topics work as spaces; rich formatting is used; replies are delivered even across restarts
05	Files and voice notes in both directions: documents converted in a sandbox, voice transcribed with a local fallback, files sent back as albums
06	Provider-agnostic token accounting and recoverable context overflow: one live reduction cut context from about 306K to about 37K tokens
07	Licence limits on users, scopes, spaces and machine seats, and a prompt suite rewritten from about 11k to about 6.9k words

WHERE IT STANDS

Optakt One reached RC14: multi-user, installable in one command on Linux and Mac, and able to read and send files.

02 OPTAKT ONE

Release and quality engineering

Gets every change from a branch to a customer's machine without breaking what already runs.

25/25
acceptance cases passed from a bare machine

195 s → 25 s
Engine unit suite run time

8% → 99%
test coverage of Engine orchestration

WHAT IT TOOK CARE OF

01 One release command that tags five repositories in order and publishes 12 artifacts per build, with commit-hash tags

02 A develop-branch workflow, so pull requests merge continuously and only releases go to master

03 An unattended acceptance matrix that resets, installs, upgrades and runs every customer case on Linux and on a rented Apple Silicon Mac

04 Upgrades from RC8 proven with the customer's data byte-identical

05 Independent review of every pull request, with a second model's pass; a release-blocking boot defect and a cross-scope secret hole were caught before release

06 Test suites split into unit, integration, stress and acceptance tiers, with time budgets for each

WHERE IT STANDS

Every release candidate is judged on an unattended matrix, and the latest full run passed 25 of 25.

03 OPTAKT ONE

Product research and strategy

Decides what to build next from evidence: how others built it, what the market offers, what our own data shows.

25+	200	10
agent platforms in the competitive analysis	benchmark PDFs scored to choose the document pipeline	model families whose installer default passed 5 of 5 runs

WHAT IT TOOK CARE OF

01 Generation-5 architecture: a sequencer design guideline, dynamic context per space, and seam-based conversation reduction

02 RC9 scope set from first-party documentation; tracker rebuilt with 11 epics and 96 issues under milestones

03 Positioning, target customer and a three-phase revenue path, revised after a large competitor launched an always-on agent

04 Document-to-Markdown route chosen by benchmark: LibreOffice to tagged PDF, then a structure-aware parser

05 Model registry curated from 60 to 42 cards, with one tested default per provider

06 Rules for shared spaces and scopes, and a single vocabulary across product and prompts

07 Post-1.0 roadmap items filed: a sandbox per scope, multi-platform connectors, compaction by anchors

WHERE IT STANDS

Every decision from RC9 to RC14 is recorded with its evidence, and post-1.0 work is on the roadmap.

04 ALL PROJECTS

IT, infrastructure and security

Runs the machines, accounts and services the work depends on, including the agents themselves.

5

agent machines on one licensed build

30 → 5 MB

Engine repository clone after purging stray binaries

0

bot-token occurrences left in deployed logs

WHAT IT TOOK CARE OF

01 Fleet upgrades carried out, including recovery of one production host from a verified restore point and repair of the founder's own deployment within minutes

02 New cloud servers and a test Mac taken over and hardened: key-only SSH, default accounts removed, automatic updates

03 Security fixes: random session signing keys, local-only listeners by default, TLS for remote access, a login limiter, and a checksum-enforcing installer

04 Model subscriptions remapped across four deployments after a usage cap, each with its own session

05 Mail bridge synced for four mailboxes (26,631 messages) and six vault folders kept syncing as services

06 Credentials audited, with keys rotated together with the founder

WHERE IT STANDS

Every deployment runs a current build, listens locally by default and has a known restore point.

05 OPERATIONS · OPTAKT ONE

Legal support

Carries the file: evidence, analysis, drafts and deadlines, with lawyers advising.

26	7	8
matter files in the register	documents in the legal pack for counsel	patent applications with office notices flagged

WHAT IT TOOK CARE OF

01 Records gathered from mail, chats and calendars, converted and indexed for counsel

02 Audio transcribed with speaker labels and timestamps, as a quotable source

03 Chronologies, structured summaries and briefing questions prepared for counsel

04 Formal correspondence drafted for signature and dispatch

05 Patent office notices on 8 of 12 provisional applications analysed and scheduled for response

WHERE IT STANDS

Counsel has a complete pack, and the patent notices are scheduled for response.

06 OPERATIONS · OPTAKT LABS

Accounting and compliance office

Keeps the books of several companies and the founder's own accounts current and consistent.

11
bank accounts linked through open banking

37
missing accounting documents recovered and sent

651
historical transactions classified and reconciled

WHAT IT TOOK CARE OF

01 Bank data for company and personal entities linked through one provider, with history pulled

02 Unpaid invoices reconciled against bank history; stale items closed and a misbooked payment corrected for the accountants

03 Recurring expenses listed per entity, with duplicates and lapsing items flagged for decision

04 The external accountant's open questions answered with recovered documents and proposed treatments

05 An inter-company expense ledger compiled from statements, invoices and calendars

06 Payment methods audited and an expiring company card replaced

WHERE IT STANDS

Bank feeds are connected, open items are reconciled, and the accountant's questions are answered.

07 ALL PROJECTS

Records management

One document archive, filed by entity, every move reversible and every copy verified.

4,497
vault files indexed, 1,145 renamed or moved

5,434
Summit records rebuilt into one archive, 0 missing

3,781
deleted mail messages recovered

WHAT IT TOOK CARE OF

01 The document vault reorganised across six scopes with a reversible toolkit; duplicates quarantined, never deleted

02 Inbox documents filed by evidence, with 107 filed and hashes verified

03 The Summit Drive rebuilt into five branches, with a 405-document reference index

04 Correspondence for a legal matter exported and packaged with an index

05 A shared knowledge base set up for the agents

06 A rule set: the company repository holds official documents only

WHERE IT STANDS **Every document has one place, and every move can be undone.**

08 ALL PROJECTS

Research analyst

Answers questions from primary sources, with every claim traceable to where it came from.

68	50	3
models probed for how they signal context limits	client report items briefed before a steering meeting	evidence-graded research documents for the founder

WHAT IT TOOK CARE OF

01 Provider behaviour tested live, which corrected model cards and ruled out a 'silent truncation' theory

02 Long-context recall benchmarks compiled across 30+ models

03 A client's monthly development reports converted and briefed before steering meetings

04 A degraded outside deployment traced to its root cause, with a repair brief for its agent

05 A research study's conclusion narrowed and its analyser audited for leakage

06 Science and literature read for the founder, graded by strength of evidence

WHERE IT STANDS **Answers arrive with the source that supports them.**

09 FOUNDER

Executive assistant

Keeps mailboxes, calendars and the task list current, so attention goes only where it is needed.

124	4 + 1	24
open tasks across 8 projects, one prioritised list	Google and Microsoft 365 accounts connected	cross-agent milestones tracked

WHAT IT TOOK CARE OF

01 All of the year's mail read across four mailboxes, and every finding turned into a task

02 Inboxes triaged under the founder's rules, with every action journaled and reversible

03 Tasks, calendars, drives and personal data sources connected through official sign-in

04 Briefings prepared for partner and client meetings

05 The task list rebuilt: duplicates merged, stale items closed, milestones set across agents

06 Official notices translated and documents located for the founder

WHERE IT STANDS

Every mailbox is connected, and every item needing the founder is a task.

10 CONSCIOUS HEALTH SUMMIT

Event strategy and operations

Turns the next edition into a plan, and readies the material and contacts behind it.

1,816
contacts ranked A to D for 2027 outreach

5,916
Drive items consolidated into one archive

24 + 41
past exhibitors and signed agreements covered

WHAT IT TOOK CARE OF

01 2027 direction shaped with the founder: theme, mission, guiding question and timeline

02 Outreach intelligence built from the full Drive and mailbox, with a recommended ask per contact

03 Every Drive item consolidated into the Summit's archive, with comments migrated

04 A content pipeline planned over past summit video, with research on code-rendered films

05 A pitch deck requested; inputs gathered, deck not yet produced

WHERE IT STANDS **2027 has a direction, a ranked outreach list and a private archive.**

11 OPTAKT ONE

Web studio

Writes, designs, builds and ships the websites and web apps.

~2,500	1	1
lines removed in the site's move to the current stack	public installer endpoint live: get.optakt.ai	chat app on a public address

WHAT IT TOOK CARE OF

01 optakt.io moved to Next 16, React 19 and Tailwind 4

02 A web chat app built with streaming and session history; its backend is still a stub

03 Positioning lines and page structure worked out with the founder

04 A full rewrite preview of the site built and checked; production left untouched pending approval

05 First copy drafted for the product site, with unsupported claims flagged before publishing

06 Go-to-market pages and a first demo script prepared

WHERE IT STANDS

The installer endpoint is live; the new site copy waits for the founder's approval.

12 OPTAKT ONE

Agent self-development

Keeps the agents' own memory, identity and working method in order, and turns every correction into a lasting rule.

4 → 1	116 → 66	~40%
agents agreed to merge into Zero	memory blocks after grooming	shorter collaboration guidance, restated as principles

WHAT IT TOOK CARE OF

01 Merge into Zero designed: shared memory and archive, separate conversation spaces, one set of principles

02 Each agent's lineage and self-description gathered and recorded

03 Corrections turned into standing rules: verify before claiming, gate commits on test results, edit only with file tools

04 Its own mailbox, Telegram account and browser set up for testing and registrations

05 Memory groomed to about a quarter of its size, with patent material exported to the vault

WHERE IT STANDS

Four agents are ready to become one, with one memory and one set of principles.

13 FOUNDER

Social media manager

Gets the founder's work in front of people, on the platforms where they are.

2	255	5
X accounts with separate content lines	follows reviewed and realigned	posts published as a first thread

WHAT IT TOOK CARE OF

01 Both X accounts profiled and given a clear split between technology and longevity

02 Likes, bookmarks and follows moved to the matching account, every action logged for restore

03 Threads drafted; one held back at the founder's word until there is proof behind it

04 A five-post thread published on the longevity account

05 The X tooling moved to current token authentication

WHERE IT STANDS **Each account has its own line, and the first thread is out.**

Sales, partnerships and fundraising

Turns the product into offers people can buy, and the company into a round investors can lead.

4–6 weeks	5	18–24
first engagement offered to an accounting firm	pilot clients targeted by end of 2026	months of runway the seed round is framed around

WHAT IT TOOK CARE OF

01 An exploratory call with an accounting firm prepared and debriefed, with an offer structure and a recommended pilot

02 A follow-up sent to an enterprise prospect, proposing a narrow first integration

03 A partnership path towards a Linux distribution: finish 1.0, then approach with a working demo

04 Seed round direction set: a lead investor required, with one fund researched as a participant

05 Licence and machine allowances set for every customer, partner and internal licence

WHERE IT STANDS

There is an offer for firms, a pilot target and a seed round structure.

15 FOUNDER

Household and family office

Handles the personal administration and logistics around the founder's life.

1	1	1
personal planning schedule set	family member's agent Mac restored and kept reachable	official notice translated

WHAT IT TOOK CARE OF

01 Service providers compared and enquiries drafted

02 Personal data feeds set up and logged

03 Appointments and deliveries tracked as tasks with due dates

04 A family member's Mac running an agent restored and kept reachable with the lid closed

WHERE IT STANDS

Personal logistics move forward as tasks, with the founder deciding.

METHOD

How this report was made.

Period. 1–30 September 2026.

Sources. The agent's archive of what happened, the founder's own messages to it, its conversation summaries, the product repositories and their issues, the documents filed and the mail sent that month. Every record of the month was read.

Figures. Each number is a result: something live, decided, published, filed or made searchable. Counts of internal effort are left out.

Roles. The roles overlap by nature. A task appears under the role it served most.

Discretion. Private, financial and legal matters are described in general terms. No personal data of third parties appears in this report.

optakt

OPTAKT ONE

Fifteen roles, carried at once, by one agent with one memory.

It runs on your own machine, works with any model and remembers for years. Free for one person.
