optakt

MONTHLY REPORT · 1–31 OCTOBER 2026

What the agent took care of.

October 2026: one month of an Optakt agent working for one founder, twenty roles, the results in each, and the work behind them.

OPTAKT LABS OÜ · TALLINN

OPTAKT.AI

October 2026.

This edition covers one month of Zero, the Optakt One agent working for founder Max Wolter. On 1 October the four agents that had run under earlier names (Maximus, One, Lux and Boltagon) were merged into a single deployment, Zero, with one identity, one memory and one archive. Everything below was done by that one agent, working through several facets with their own topics and workspaces.

The month had four main threads. Optakt One was taken to its Beta 1 release line: integrations, Slack and Discord, a sandbox per scope, free licences and a rebuilt upgrade path, published as beta.4 for testers at month end. All three websites were rebuilt and the documentation was published. The Conscious Health Summit was relaunched around its 2025 footage, a new identity and a plan for 2027. The books, filings and records of the founder's companies were brought current.

Financial, tax, legal and personal matters appear here only in general terms. The agent reconciled accounts, prepared filings, documented loans, supported advisers on legal files and handled family administration. Amounts, balances, counterparties and the substance of any dispute are deliberately left out.

Roles are ordered by the weight of the month's work, not by importance to the business. Each figure is an outcome taken from the records. Where work is unfinished, the result line says so.

The month at a glance.

Optakt One

beta.4
published for testers, with 12 verified artifacts

17
sign-in apps live on Optakt Connect

3
chat platforms: Telegram, Slack and Discord

Conscious Health Summit

3.3 TB
of 2025 footage archived and verified in the cloud

45,001
photos and keyframes described and searchable

2027
edition planned: dates, ticket model and timeline

Optakt Labs

1
consulting offer published on optakt.io

109
leads ranked from 723 private conversations

13
provisional patent applications kept alive

Companies and administration

3
years of crypto accounts rebuilt and delivered

16,674
documents migrated with 0 checksum mismatches

3
countries' accountants coordinated

Founder

4 + 5
mailboxes and calendars connected and kept current

26
phone calls by the agent in 30 days, 24 answered

183
open tasks checked against the record

01 OPTAKT ONE

Software engineering team

Builds the product itself: an agent that remembers, runs on the customer's machine and connects to the tools a company already uses.

3	17	3
chat platforms: Telegram, Slack and Discord	sign-in apps live on Optakt Connect	execution modes: unrestricted, sandboxed, isolated

WHAT IT TOOK CARE OF

01 One integration catalogue, with permissions in plain words, terms warnings and shipped playbooks; secrets are sealed on connect.optakt.ai and login codes pass through a live relay

02 Slack and Discord brought up beside Telegram, with a durable outgoing queue so the core never waits on a platform

03 A sandbox per scope with owner-granted directories, and an execution mode chosen at install

04 Per-scope licences (Free, Solo, Team, Enterprise) and free beta licences; licence-server traffic per licence cut from about 7,200 requests a day to 29

05 The old migration system replaced by a standard installer and upgrader, with agent-assisted repair for anything non-standard

06 Scheduled tasks, cross-space wake, delegation to coding agents, a second-opinion tool and computer use

07 Defects found on testers' Macs and servers traced to root cause and fixed in the product

WHERE IT STANDS

Beta 1 is assembled across five repositories and beta.4 is in testers' hands.

02 OPTAKT ONE

Release and quality engineering

Gets every change from a branch to a customer's machine without breaking what already runs.

0	12	19 s
failures in the Dev122 full pass across 11 Linux and Mac groups	verified artifacts each for rc.19 and beta.4	to a ready test worker, down from 1–15 minutes

WHAT IT TOOK CARE OF

01 Release channels put into semver order: 22 misnamed releases yanked and 110 tags renamed, all verified with 0 mismatches

02 Unit tests rebuilt as one matrix per construct, for example 376 Core integration tests folded into 41 matrices that run in 13 s

03 Historical upgrade cases from earlier releases replayed on fresh Linux and Mac machines, using fixtures generated by those releases' own code

04 Disposable test workers built from warm images, which clean up after themselves and release their licence slots

05 Every release candidate reviewed independently by two model families, with findings fixed by class rather than one at a time

06 Large fixtures moved out of git into private storage; the core repository shrank from 88 to 21 MB

07 Two installer incidents on get.optakt.ai caught, rolled back and fixed

WHERE IT STANDS

A release ships only after one full battery on fresh Linux and Mac machines passes.

03 ALL PROJECTS

Infrastructure and security

Runs the machines, accounts and services the work depends on, including the agent itself.

4
agent deployments merged into one, Zero

91/91
tables restored with 0 differences in the backup test

5
machines reachable by key-only SSH

WHAT IT TOOK CARE OF

01 Four predecessor agents merged into Zero, and all 12 old databases dumped and verified by checksum before the old hosts were retired

02 Code server found running an outdated version with an exploited flaw: upgraded, secrets rotated, public SSH closed

03 Nightly off-machine backups set up, with a full database restore proven

04 Credential vault audited: every entry mapped to a playbook, stale tokens removed

05 Mail, calendars, WhatsApp, Telegram and Google reconnected under managed sign-ins

06 Repeated stalls of the agent's own service traced from its records and repaired without data loss

07 Disks resized and cleaned, and automatic updates on every Linux host

WHERE IT STANDS

One agent runs on hardened, patched machines, with backups that have been proven to restore.

04 THREE COMPANIES · FOUNDER

Accounting and compliance office

Keeps the books, filings and compliance of companies in three countries current and consistent.

3	0	563
years of crypto accounts rebuilt and delivered (2023–2025)	mismatches across 2,858 exchange ledger entries	events-company bank lines catalogued, 3 left open

WHAT IT TOOK CARE OF

01 Crypto accounts for 2023–2025 rebuilt on the audited valuation method; every account ties to exchange and on-chain records

02 Recovered holdings traced, claimed, sold and paid into the company bank account, with every movement documented

03 Loans between the companies and the founder documented at arm's-length rates, signed and filed

04 Vendor invoices reissued in the right company's name, and missing documents chased and filed

05 Tax and social-security filings and correspondence with the authorities brought current

06 Correction packages sent to the accountants in Estonia, Luxembourg and Portugal, each checked line by line against ledgers

07 Bank compliance handled: address changes and source-of-funds documents

WHERE IT STANDS

The books of all three companies are reconciled and in the accountants' hands; the remaining items are listed and tracked.

05 OPTAKT ONE

Product research and strategy

Decides what to build next from evidence: how others built it, what users report, what our own data shows.

86
integrations researched against provider terms

50
decision and forecasting model issues filed

10
personal-agent products in a one-page comparison

WHAT IT TOOK CARE OF

01 Beta 1 scope and onboarding design settled with the founder and turned into roadmap issues

02 How other agent harnesses handle triggers and tasks researched from pinned source code

03 A comparison matrix of Optakt One against frontier-lab and open-source agents

04 Positioning for optakt.ai settled, with sourced statistics and the plan tiers

05 Competing memory products and research papers assessed against the design

06 Self-serve plans, a free beta and licence rules decided

WHERE IT STANDS

Every Beta 1 design question has a roadmap issue with its evidence.

06 ALL PROJECTS

Research analyst

Answers questions from primary sources, with every claim traceable to where it came from.

31/31	16 h	539
quotes verified in a sample research report	of lectures made into an offline, searchable library	works preserved in a verified local text archive

WHAT IT TOOK CARE OF

01 A research desk built as a proof of concept: every quote checked against its saved page

02 The founder's public track record verified against primary sources

03 Tools, models and competitors evaluated through live tests and documentation

04 Viral claims checked against their sources

05 Scientific literature questions answered by strength of evidence

06 Shared growth and sales material distilled into the playbooks

WHERE IT STANDS **Answers arrive with the source and the quote that support them.**

07 OPTAKT · SUMMIT

Web studio

Writes, designs, builds and ships the websites, with a preview for every change.

4	22	4
sites live, including a live memory map	documentation pages published	legal pages live: terms and privacy on both Optakt sites

WHAT IT TOOK CARE OF

01 optakt.io: the consulting site, with the offer, guarantee, founder page and FAQ

02 optakt.ai: the product site, with plans, an architecture section, light and dark themes and a switcher between the two sites

03 optakt.ai/docs: 22 pages checked against the released source, with 0 accessibility findings

04 summit.consciousheath.io: rebuilt from scratch, with a new hero, a line-up of 42 speakers, 24 exhibitors and one adaptive sign-up form

05 knowledge.optakt.io: a live, privacy-safe map of over 20,000 archive entries, refreshed every 15 minutes

06 Crawl and indexing fixed across all three domains; a dead-link scan of 195 paths found 0 failures

WHERE IT STANDS

Every site is live on its own design system, with legal pages that match what actually runs.

08 OPTAKT ONE

Agent self-development

Turns the agent's own mistakes and the founder's corrections into how it works from then on.

6,902	432	6
archive entries read and rewritten in one voice	memory blocks reviewed	facets of one identity, each with its own space

WHAT IT TOOK CARE OF

01 Four predecessor identities merged into Zero, with facets as ways of working rather than departments, and a sixth facet, Stream, added for content production

02 Memory and archive rewritten in the first person from one shared identity, then re-embedded so that none is missing from search

03 Principles rewritten from a ledger of corrections into positive practices, cut from about 11,200 to about 2,600 words

04 Memory contexts tuned, with one space's attached context cut from 12,275 to 4,970 tokens

05 Founder corrections turned into standing rules throughout the month: carry the work, look before speaking, say it plainly

06 A phone-calling capability built and tuned until calls to call-centre lines succeed, always disclosed as AI

07 Its own stalls traced to their causes, among them provider rate limits and a stream error misread as a stop

WHERE IT STANDS

One identity with one memory, whose principles carry the month's lessons.

09 FOUNDER

Executive assistant

Keeps the mailboxes, calendars and task list current, so attention goes only where it is needed.

4 + 5	183	18
mailboxes and calendars kept current	open tasks checked against the record	tasks closed and 59 corrected in one pass

WHAT IT TOOK CARE OF

01 Mailboxes swept: what needs a decision surfaced, the rest handled and filed

02 Replies drafted and sent on the founder's word, each one checked in Sent

03 Meetings booked; a meeting recorder joins calls and files the transcripts

04 Whole-life overviews and weekly priority lists built from primary sources

05 Phishing attempts identified and flagged

WHERE IT STANDS

Every inbox item is either handled or flagged for the founder's decision.

10 OPTAKT · SUMMIT

Growth and performance marketing

Sets the measurement and advertising strategy, then builds and runs the machinery behind it.

3	3	366
public sites measured, with consent by visitor location	customer lists syncing to Google every six hours	of 1,006 subscribers enriched with a company, up from 131

WHAT IT TOOK CARE OF

01 GA4, Google Ads, Meta, LinkedIn and X on all three sites, with Global Privacy Control honoured and nothing sent before consent

02 Purchases and leads sent server-side and verified end to end with sandbox test purchases

03 Closed partner deals from the invoicing system fed back to Meta and Google

04 Platform policy checks for EU visitors handled, with copy updates and an hourly monitor

05 The Summit newsletter list migrated and cleaned, with signups wired to it

06 An ad operating approach for ticket sales built from practitioner research

WHERE IT STANDS **Every visit, signup, purchase and deal is measured.**

11 ALL COMPANIES · SUMMIT

Legal support

Carries the file: preparation, deadlines and follow-through, with lawyers advising.

3	14	2
countries' company law covered	registry certificates retrieved and filed	Summit legal pages rebuilt: terms and privacy

WHAT IT TOOK CARE OF

01 Company name, seat and articles changes drafted, signed in the minute book and filed

02 Resolutions and agreements prepared for signature

03 Legal files organised and indexed for counsel

04 Formal correspondence drafted, signed and sent by registered mail

05 Correspondence researched and drafted for the founder to send

06 Summit terms and privacy rewritten under Portuguese consumer law

WHERE IT STANDS

Corporate documents are signed and filed, and every legal file is current for its advisers.

12 ALL PROJECTS

Records management

One document archive, filed by company and purpose, every copy verified.

16,674
files migrated with 0 checksum mismatches

2,235
duplicates removed, each against a re-hashed twin

1,918
newsletters sorted into 87 folders

WHAT IT TOOK CARE OF

01 A 177.6 GB archive moved into one category-first layout per company

02 Documents classified by content and 919 official documents renamed to a dated scheme

03 Laptops and desktop inventoried by hash; unheld files pulled and 261 GB of media backed up

04 585 flagged and unread emails triaged, with 182 documents filed

05 Call transcripts from three sources summarised and filed by company

06 A searchable register of every link and file exchanged in chat, rebuilt hourly

WHERE IT STANDS

Every document has one place, and every copy is verified before an original is touched.

13 CONSCIOUS HEALTH SUMMIT · FOUNDER · OPTAKT

Social media manager

Gets the work in front of people, on the platforms where they are, and keeps every public profile saying the same true thing.

10
2025 talks scheduled on YouTube in 2 playlists

337
of 1,008 founder posts removed after a tone audit

3
company pages aligned on Facebook and LinkedIn

WHAT IT TOOK CARE OF

01 Summit Reels published on Instagram with collaborators, location and audio credit, and a gate that blocks publishing until all three are set

02 Ten full talks titled, described and scheduled on YouTube, three Shorts lined up, and the YouTube API compliance audit passed

03 LinkedIn, Facebook and X connected through official APIs, including LinkedIn page management and X ads access across three accounts

04 Facebook and LinkedIn pages for Optakt Labs, Optakt One and the Summit realigned with the live websites: copy, logos and covers

05 The founder's LinkedIn profile rebuilt from a 128-source research pass, and his X bio and cover rewritten

06 Both of the founder's X accounts audited against his tone standard, with each deletion verified

07 An X reply and topic engine designed on the official API, run in shadow mode and paused for a redesign

WHERE IT STANDS

The Summit publishes on Instagram and YouTube, and every company page matches its website.

14 OPTAKT LABS · OPTAKT ONE

Sales and business development

Turns a personal network into a pipeline, and the product into an offer people can buy.

109	11	1
leads ranked from 723 private conversations	people set up for the first cloud cohort	outside trial requested

WHAT IT TOOK CARE OF

01 Consulting offer structured and published: discovery, staged payment, money-back guarantee

02 A leads and relationships database of 108 records, with every cell verified

03 Consulting and Summit one-pagers and a 10-slide consulting deck

04 The product presented live to a prospect, who asked for a trial

05 Beta 1 launch messages drafted for waiting testers and past leads

06 Awards pitch for a Luxembourg event designed with the founder

WHERE IT STANDS

A published offer, a ranked pipeline, a first cloud cohort and an outside trial request.

15 PERSONAL LIFE

Household and family office

The administration of a family living across two countries.

1	6	3
vehicle documented, inspected and listed	documents sent to a consulate for a passport application	institutions updated with the new address

WHAT IT TOOK CARE OF

01 A vehicle's documents assembled, its inspection booked by phone, and a listing published and shared in nine community groups

02 A passport application prepared for a family member, with forms prefilled for signature

03 The address change carried across the tax office, social security, the bank and the insurer

04 A utility account updated, online access restored and a direct debit set up

05 A toll account fault traced to its cause and corrected

06 An insurance claim assembled and submitted within its window

07 Home maintenance visits followed up, and a gardener booked the same day for a family event

08 Suppliers found and contacted at short notice by email, WhatsApp and phone, always disclosed as an AI agent

WHERE IT STANDS

Family administration moves forward with the founder signing, not chasing.

16 CONSCIOUS HEALTH SUMMIT · OPTAKT

Video production studio

Turns raw event footage into a searchable library and finished films.

3.3 TB
of footage archived, 15,084 files verified

45,001
photos and keyframes described

40
talks transcribed with speaker turns

WHAT IT TOOK CARE OF

01 Full 2025 drive archived to cloud storage, with upload-only credentials and checksums

02 Vision models tested blind before the bulk run; every image described with one model

03 Cameras, photos and speech aligned on one checked Lisbon clock; an 81 GB damaged recording recovered

04 Speaker Reels built with automatic quality gates, word-timed captions and licensed music

05 27 talks cut and reviewed against platform policy for YouTube

06 A first Optakt brand film delivered: 86 seconds, rendered on a temporary GPU worker

WHERE IT STANDS

Any 2025 Summit moment can be found by meaning and cut into a Reel.

17 CONSCIOUS HEALTH SUMMIT

Event strategy and finance

Turns the next edition into a plan that can carry itself financially.

2027	2025	40
edition planned: dates, model and timeline	ticket sales reconstructed from payment records	stands fitted on the 2027 floor plan

WHAT IT TOOK CARE OF

01 2025 costs broken down by category and checked against market benchmarks, line by line

02 Ticket ladder, launch tier and release calendar set against 2025 sales curves and peer events

03 Exhibitor stands, founding exhibitors and sponsor packages designed, including an AI partner

04 VIP and speaker terms: who pays, who is paid, who gets what

05 Public funding route assessed and prerequisites named; application targeted for December or January

06 Exhibitor survey run: 6 of 7 respondents said exhibiting was worth it

07 Exhibitor deck and partner one-pager built

WHERE IT STANDS

The 2027 edition has a timeline, a ticket and package model and a funding route; the budget is still being validated with suppliers.

18 OPTAKT ONE · OPTAKT LABS · SUMMIT

Fundraising

Finds the money the companies need: accelerators, investors and public programmes, with the story and the evidence to win them.

5	7	1+4
applications prioritised with deadlines	accelerators compared on terms and fit	lead and co-investor candidates identified

WHAT IT TOOK CARE OF

01 Accelerator rules read first-hand for three programmes, and draft answers written for the first application

02 A story spine, four core claims and a seven-slide deck outline built on checkable evidence

03 A register of every fund, accelerator, angel and grant the founder shares, grouped by thesis fit

04 EU, Portuguese and Gulf funding programmes assessed for eligibility, timing and fit

05 Investor documentation reviewed, with an update sent by the founder

06 A summit subsidy route and a grant consultancy's offer worked through, with questions sent

07 Company digital assets consolidated and listed, and a locked holding verified and claimed

WHERE IT STANDS

Every target programme has a deadline, a draft and the evidence behind its claims.

19 CONSCIOUS HEALTH SUMMIT · FOUNDER

Event operations

Runs the operational side of events: floor plans, exhibitor and speaker follow-up, on-site sales and suppliers.

40	22	5 of 6
stands fitted on the 2027 floor plan, against 21 in 2025	2025 exhibitors surveyed, 6 replies so far	responding exhibitors say taking part was worth it

WHAT IT TOOK CARE OF

01 2027 floor capacity estimated from the 2025 venue drawing and safety plan: about twice the stands, plus a third stage seating about 100–120

02 A first 2027 floor plan of 40 stands, with stages, aisles, exits and seating kept clear and checked by script for overlaps

03 A three-question exhibitor survey sent to 22 exhibitors with personal tracked links, bounces checked, a nudge to non-responders drafted for approval

04 Exhibitor replies used to open talks on the next edition, including a larger floor and premium placement

05 Speakers sent their Reels and footage links individually, a speaker's request for clips logged, and a keynote enquiry for 2027 answered with proof from the first edition

06 On-site sales for exhibitors worked out under Portuguese invoicing rules: brands sell through the organiser on certified POS with card readers

07 Signup rules set so that only intended entries are refused

WHERE IT STANDS

The 2027 floor has a first plan, exhibitor feedback is coming in, and on-site sales have a decided route.

20 OPTAKT LABS

Intellectual property

Keeps the patents alive and makes ownership of the software and patents clear on paper.

13	12	2
provisional patent applications kept alive	missing-parts notices answered with receipts filed	signed documents on software and patent rights

WHAT IT TOOK CARE OF

01 Every patent office notice read, fees settled before deadline and receipts filed

02 The software transfer and patent licence between founder and company drafted, rebuilt for paper signing, signed and filed

03 The future transfer of the patents to the company recorded as a decision

04 The conversion deadline for the provisionals tracked

05 A preliminary trademark search run for a new product name, with filing deferred

WHERE IT STANDS

All 13 applications are alive, and ownership of the software and patents is documented and signed.

METHOD

How this report was made.

Period. 1–31 October 2026.

Sources. The agent's archive of what happened, the founder's own messages to it, its conversation summaries, the product repositories and their issues, the documents filed and the mail sent that month. Every record of the month was read.

Figures. Each number is a result: something live, decided, published, filed or made searchable. Counts of internal effort are left out.

Roles. The roles overlap by nature. A task appears under the role it served most.

Discretion. Private, financial and legal matters are described in general terms. No personal data of third parties appears in this report.

optakt

OPTAKT ONE

Twenty roles, carried at once, by one agent with one memory.

It runs on your own machine, works with any model and remembers for years. Free for one person.
